Re: OSHA Compliance Group Inc.

Dear fellow ISNetworld Subscribers:

Our company is located in sunny Southern California. We've been in business for four decades and have worked with Jones Lang LaSalle for about three years. About two years ago Jones Lang LaSalle started requiring all its vendors to subscribe to ISN. Because we have a very comprehensive safety program already in place for our company, we thought it would be a simple matter to get an "A" rating for full compliance. Boy, were we wrong!

After spending more than nine months struggling through the entire daunting process of becoming compliant, we were unable to do so and were ready to give up. We were frustrated and had spent well over 200 employee hours without any forward movement at all. Giving up would have meant losing a long-time business relationship and the income that provided our company. But all that changed last summer when someone at Jones, Lang LaSalle referred us to OSHA Compliance Group for help.

We are so excited! OSHA Compliance Group is truly a life saver. Our ISNetworld RAVS were created and submitted immediately, and we found our score at 100% after an expedited review process was completed. OSHA Compliance Group saved us countless hours of dealing with ongoing loop holes, grinding aggravation, and constant headaches. The ongoing service agreement OSHA Compliance Group offers is just another bonus to the initial bargain. OSHA Compliance Group not only met our needs, it has far surpassed our expectations. OSHA Compliance Group is a blessing to vendors – it completely eradicates the nasty time consuming and circuitous, unfathomable process of ISNetworld. We only wish that someone could have told us about this great company and its superb services sooner!

We *highly* recommend OSHA Compliance Group and can't say enough good things about them. If any vendors (or owners!) would like to contact us about our experience with this terrific company, please feel free to contact me directly at (714) 742-7881.

Thank you, OSHA Compliance Group!
